EDUCATION

Northeastern University
Honors Program
B.S. in Computer Science
Concentration in Artificial Intelligence
Minor in Global Fashion Studies
Boston, MA | Sept 2023 - December 2027

COURSES

Web Development
Machine Learning 1 & 2
Artificial Intelligence
Algorithms and Data Structures
Object-Oriented Design
Theory of Computation

SKILLS

TypeScript
JavaScript
React
HTML
CSS
Next.js
Python
Chakra UI
Storybook
Git

EXPERIENCE

PRICELINE July 2026 - Present
Frontend Flights Search Co-op NYC, NY

- Built a custom component for an A/B test to improve Express Deals usage, which increased Express Deal revenue by $1046/day in a 2-week span, resulting in a winning test
- Implemented client and server-side support to display checked baggage inclusion on Express Deals when available, as part of an ongoing A/B test
- Fixed bugs across mobile and desktop, including layout issues, UI flickering, and a 4-year-old bug that incorrectly enabled takeoff and landing time filters
- Developing an in-progress A/B test to redesign the details slice information section to improve clarity on a page every flight customer visits immediately before checkout

TypeScript, JavaScript, React, Tailwind CSS, Storybook

VIMEO June 2025 - Nov 2025
Frontend Platform Co-op NYC, NY

- Managed design systems deprecating legacy hooks, styles, and components across 600+ files
- Executed core component migrations for the Bokeh library upgrade from Chakra UI V2 to V3
- Migrated legacy PHP pages to Next.js to modernize the stack and improve platform performance
- Developed reusable UI components, such as an AvatarGroup, to expand the internal library

TypeScript, React, Chakra UI, Next.js, Ark UI, Storybook

THE AVENUE Jan 2026 - Present
Web Developer Boston, MA

- Redesigned the website for Northeastern's fashion magazine into a high-end editorial look
- Developed custom HTML & CSS within Squarespace to create a unique, responsive interface that exceeds template limitations and strengthens The Avenue's digital presence
- Restructured site architecture within Squarespace, implementing collection pages to enable dynamic article aggregation and maintain consistent, scalable page formatting across the site

HTML, CSS, UI/UX Design, Squarespace

PROJECTS

INTERACTIVE ARCHITECTURE WEBSITE In Progress

- Created an interactive portfolio website for a Northeastern architecture student, leading the design and site architecture in collaboration with the client, with extensive custom CSS interactivity throughout
- Built a custom Three.js interaction so users can explore the student's Rhino library rendering in-browser
- Currently optimizing mobile responsiveness and image load times

TypeScript, React, Three.js, Chakra UI

CANVAS LMS RECREATION Jan 2026 - April 2026

- Built a full-stack recreation of Canvas, a learning management system, as part of a web development course, supporting sign-up/sign-in, course creation and enrollment, and assignment and quiz creation, with the ability for students to take quizzes and receive graded feedback
- Implemented role-based access control for permissions across admin, faculty, and student roles
- Persisted user sessions via cookie-based authentication and stored application data in MongoDB

TypeScript, JavaScript, React, Tailwind, Redux, MongoDB

IMAGE-BASED TEXTILE COMPOSITION CLASSIFIER Nov 2024

- Built a multimodal deep learning model in PyTorch using a fine-tuned ResNet-50 backbone to extract image features and predict fabric composition from clothing images
- Designed a single-head self-attention mechanism to aggregate features across multiple images, fused with clothing type embeddings via Feature-wise Linear Modulation (FiLM)
- Implemented a custom combined loss function incorporating BCE, MSE, sparsity, and count penalties with inverse-frequency class weighting to handle fabric class imbalance

Python, NumPy, PyTorch
